SDG 7.4: Energy and the community

7.4.1: Does your university as a body provide programmes for local community to learn about importance of energy efficiency and clean energy?

Al-Mustaqbal university has recognized the importance of promoting energy efficiency and clean energy within their local communities. As part of their commitment to sustainability and community engagement, the university offers programs and initiatives aimed at educating the local community about these topics. Here are a few ways in which the university provide programs for the local community to learn about the importance of energy efficiency and clean energy:

1. **Workshops and Seminars:** The university often organize workshops, seminars, and informational sessions on energy efficiency, renewable energy sources, and sustainable practices. These events are typically open to the public and provide an opportunity for community members to learn from experts in the field.

2. **Community Outreach and Extension Programs:** The university with outreach or extension departments may collaborate with local schools, community centers, and organizations to deliver educational programs focused on energy efficiency and clean energy. These programs might include interactive activities, educational materials, and practical demonstrations.

3. **Online Resources:** The university develops online resources such as webinars, videos, and informational websites that are accessible to the local community. These resources can provide information on topics such as energy conservation, solar energy, wind power, and more.

4. **Collaborative Projects:** The university engages in collaborative projects with local governments, businesses, and non-profit organizations to promote clean energy initiatives. These projects might involve installing solar panels on campus buildings, conducting energy audits in the community, or organizing energy-saving challenges.
