## 17.2: Relationships to support the goals

### 17.2.3: Does your university as a body participate in international collaboration on gathering or measuring data for the SDGs?

Yes.

In collaboration with Altinbaş Üniversitesi, MUC jointly held the [1st International Conference for Achieving the Sustainability Development Goals](#). The conference was held at Altinbaş Üniversitesi in Istanbul, Turkey. The event brought together the latest thoughts, and data gathered related to implementing the SDGs. In addition, a total of more than 120 research articles in different topics that cover most of the SDGs. It has been attended by a group of distinguished personalities from different nationalities, including Turkish, Arabs and others, in addition to postgraduate students, mostly those who are MUC graduates. In this context, this conference has highlighted the most important and recent advancements between reality and expectations to achieve sustainable development goals because of their role in establishing and developing strategic development visions, given the changes the world is going through at various levels, especially the political, economic, and social one. We attempt to discuss this according to a set of core issues including the role of the public sector, private sector, and local and international organizations in achieving the goals of sustainable development and their benefits in the light of United Nations Vision 2030.
