## **1.Introduction**

The SDGs can only be achieved with a strong commitment to partnership and cooperation at the international level. Humanitarian crises caused by conflict or natural disasters still require more resources and financial aid. Many countries also need official development assistance to encourage growth and trade. Al-Mustaqbal University College continues to achieve SDG17 through cooperation with international and local universities and institutions. Al-Mustaqbal University College has participated in many local and international workshops, symposia, and lectures have been given in support of sustainable development goals in all departments of the college.

## **2. Al-Mustaqbal University College’s partnerships to achieve SDG17**

### **2.1. Al-Mustaqbal university college is really interested in Times Higher Education (THE) World University rankings and the axis of good health and well-being**

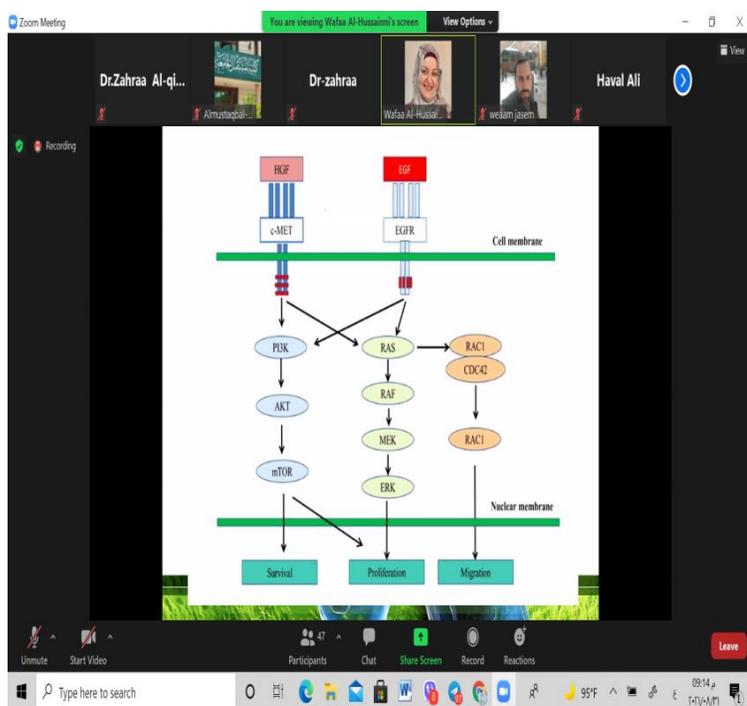

Al-Mustaqbal university college is really interested in Times Higher Education (THE) World University rankings and the axis of good health and well-being. Dr. Zahra Haleem Al-Qayyim for 3 days participated in the ZOOM conferences and attended 20 sessions on topic: “The impact of universities in the Times Higher Education Impact Rankings and in the 3rd axis of UN sustainable development goals, good health and well-being” in cooperation with the RCSI University of Medicine and Health Sciences. Also, Dr. Zahraa participated in the 8 sessions of “THE University Ranking Forum: Arab University Rankings: 2021”, in cooperation with the American University of the Middle East from Kuwait. The conference was an significant opportunity to research and understand developments, progress and innovations in the middle-eastern universities and to share the experience in regard to research evaluations, and the needs of the health axis, as well as giving a comprehensive view of the strengths and weaknesses in the main performance subjects of the participating Arab universities for building a successful classification process. Moreover, Dr. Zahraa Haleem Al-Qayyim added, “There is a necessity to follow up on all international classifications in universities and to understand their methodologies, so that they can be used in future to build higher education policies, improving the performance of universities, developing their specializations, and raising up the level of education, research and community service. In addition, the advanced level achieved by the Al-Mustaqbal university college in the “THE” classification, and strives to advance and obtain higher ranks within this classification in all its axes

## 2.2. A medical workshop about Targeted Therapy in Advanced Ovarian Cancer

A medical workshop in cooperation with Ibn Sina University for Medical and Pharmaceutical Sciences (Faculty of Medicine) delivered by Dr. Wafaa Nasser Al-Husseini PhD Biochemistry/ University of Canterbury/New Zealand Health Security Partner (HSP) Fellow 2019-Iraq Consultant Chemist In coordination with Dr. Zahra Haleem Al-Qaim The workshop entitled (Targeted Therapy in Advanced Ovarian Cancer) In it, the doctor gave an introduction to ovarian cancer and how it is formed. Surgery and chemotherapy are generally used to treat ovarian cancer. She explained that ovarian cancer is the most

common type of female cancer. Ovarian cancer is ranked fifth among the most common types of cancer causing death among women worldwide, and Dr. Wafaa added about the feeling of abnormal signs or symptoms that should be See your doctor. If you have a family history of ovarian cancer or breast cancer, you should see your doctor about the risk of ovarian cancer. It may require a visit to a genetics consultant to do a test for certain genetic mutations that increase the risk of breast cancer or ovarian cancer. At the conclusion of the workshop, Dr. Zahra Haleem Al-Qaim explained that the workshop aims to exchange experiences between researchers and academics, in addition to providing networking opportunities between researchers from different disciplines for the work of research teams aimed at finding solutions to major health problems in the field of treating diseases and limiting their spread. A number of participants from various scientific disciplines participated in the workshop, as well as a wide participation of students.

Under Auspices of the Dean of Al-Mustaqbal University College  
 Prof. Dr Hasan Shaker Majdi  
 And in coordination with Dr. Zahraa Haleem Al-qaim  
 Al-Mustaqbal University College cooperation with Ibn Sina University of Medical and  
 Pharmaceutical Sciences/ MOHESR  
 College of Medicine / workshop medical of scientific entitled:-

## " Targeted Therapy in Advanced Ovarian Cancer"

PhD Biochemistry/ University of Canterbury/ New Zealand  
 Health Security Partner (HSP) Fellow 2019- Iraq  
 Consultant Chemist

**2021/8/31 Tuesday**  
**9:00 pm**

**Dr Wafaa N. Al-Hussaini.** Meeting ID: 874 6389 6132  
 Passcode: 233926

On Zoom Platform

### 2.3.A Training Workshop entitled "One's Outward Image Etiquette"

Rehabilitation, Employment & Follow-Up Unit at Al-Mustaqbal University College in cooperation with the Holy Shrine of Al-Abbas (PUH) organizes a training workshop entitled "One's Outward Image Etiquette" The workshop lasted for two days, the 30th of April and the 1st of May 2021, and the lecturer was Dr. Farah Baqir Al-Fadhili who investigated in her lecture the management of one's outward appearance, defining it as a science and an art, which combines dress, personal grooming, body language all together with etiquette and vocal communication skills. Management of personal appearance is so vital for

creating the first positive impressions as an important step towards achieving one's career aspirations. The lecturer clarified that 90% of the impression is composed during the first 20 seconds of contact with people we meet for the first time. According to Amy Cody, a social psychologist at Harvard Business School, a person often leaves two impressions among others and not just one. People work on determining the reliability of the person they meet as well as his intentions that shall lead to doubt or trust. These two characteristics, i.e. reliability and trust, constitute 80 – 90 percent of the first impression. The workshop included lots of discussions, comments and inquiries raised by participants as well the lecturer.

#### **2.4. Department of Pharmacy in cooperation with the Administration of Health in Babylon has organized an attendance workshop entitled "COVID 19 Vaccination & its Impact on Our Life"**

The Department of Pharmacy at Al Mustaqbal University College, and in cooperation with the Administration of Health in Babylon has organized and attendance workshop under the title “ COVID19 Vaccination & its Impact on Our Life”. The aim that lies behind organizing this workshop is to encourage people to take the vaccine so that life can retrieve it normal status. The workshop has been attended by Prof. Dr. Hasan Shakir Majdi, Dean of Al-Mustaqbal University College as well as a large number of academics representing the different departments of the College. It is remarkable to note that Dr. Hussein Kadhim Aboud, specialized in Family Medicine, Head of Communicable Diseases Unit in the Administration of Health in Babylon and Dr. Amjad Sabah Al-Ubaidi, specialization board in Internal Medicine, Marjan Hospital have both participated in the workshop. The workshop has focused on a number of issues including

- What is vaccine?

- How is it manufactured?
- Types of vaccines and features of each one

• Their effectiveness The lecturers have emphasized that taking the vaccine is an important procedure, in addition to other preventive ones, so as to ensure protection against the virus, adding that complying with the general health prevention procedures, such as washing hands with soap, using sterilizers, wearing masks and keeping distance when communicating with others is highly required even after taking the vaccine. It should be noted as well that the workshop has been organized in coordination with the Head of the Activities Unit at the Department of Pharmacy and the supervision of the academics Ms. Iman Karim Kadhim, Ms. Noor Muhsin Jawad and Ms. Fatma Haidar Kadhim. At the end of the workshop, the two lecturers have been honored with a Letter of Appreciation and an MUC Shield delivered to them by Prof. Dr. Jabbar Faraj Al-Wakeel, Head of the Department of Pharmacy.

## 2.5. Scientific Cooperation between Al-Mustaqbal University College and Al-Nahrain University

In application to the principle of mutual cooperation between public and private universities, a delegation of Al-Mustaqbal University College, headed by Prof. Dr. Mijbil Rafiq Marjan visited the College of Business Economics at Al-Nahrain University as a step towards activating the Mutual Collaboration Agreement signed by both parties. The meeting has discussed the mechanism of cooperation between the

two institutions, and how to make use of shared experiences in the field of scientific research participation and exchange of related skills and knowledge as well as technical support. In additions, there shall be constant efforts to prepare studies and plans for the assessment of the educational and training programs of both parties under the spread of COVID 19 Pandemic.

## 2.6. A scientific lecture on “Clinical Immunology” has been arranged at the Health & Medical Technologies in Kufa

According to the resolution issued by the College of Health & Medical Technologies / Kufa, and based on the principle of cooperation between public and private colleges to consolidate the educational process, a joint scientific lecture was organized, supported and directed as well by Prof. Dr. Hasan Shakir Majdi, Dean of Al-Mustaqbal University College. The lecture, being in the subject of “Clinical Immunology”, was given on Thursday 12th June, 2021 by Dr. Fuad Ghazi Hassan Al-Hamadani to the fourth year students in the College of Health & Medical Technologies / Kufa. We should note however that Dr. Udai Mit’ib, the Deputy Dean of the College for Scientific Affairs has received and welcomed his guests. Besides, this activity shall be considered as part of the activities organized and implemented by the Department of Pathological Analytics at Al-Mustaqbal University College being the scientific visitor.

## **2.7. Al-Mustaqbal University College Holds the Second International Lecture on Sustainable Development Goals (SDGs)**

In lining with the vision of the Al-Mustaqbal University College in achieving the 2030 Agenda for Sustainable Development goals, Dr. Wesam Al Madhoun from University Tun Hussein Onn Malaysia was hosted on Friday, 27 November 2020 at 5:00 p.m. Local time on Zoom Meeting Platform to deliver his lecture titled: “Current Challenges and Future Sustainability Opportunities”. The lecture included a review of the importance of reducing environmental pollution, which will greatly affect its negative impact on health and reduce health care costs, and consider that the current health crisis should be a motivation for a new change in our lives in pursuit of sustainable living. The Dean of Al-Mustaqbal University College, Assist. Prof. Dr. Hasan Shakir Majdi, explained, "There are many projects that give us the opportunity to see our planet cleaner, and their implementation is a responsibility of everyone. As higher education institutions, we seek to achieve social, environmental and economic developments, as they are the most important incubators for ideas and international problems solutions, which makes it able to make a positive impact. " Head of the Research and Studies Unit Al-Mustaqbal University College, Dr. Hamza Mohammed Ridha Al-Khafaji, said that, "The number of participants in the lecture reached 60 participants from 9 countries and from several Iraqi universities, including professors and those are interested in Sustainable Development, and focused on distinguished discussions that resulted in unifying visions towards our responsibilities in producing knowledge and spreading it among generations." The Dean of the College extended his thanks

and appreciation to the lecturer Dr. Wissam Al-Madhoun, and praised the unique efforts of Research and Studies Unit and Information Technology Unit in working in a team spirit to hold such featured international lectures.

## 2.8. Al-Mustaqbal University College Launches A Series of International Lectures to Achieve the Sustainable Development Goals (SDGs)

In lining with the 2030 Sustainable Development Goals which are globally applying on everyone and in order to make the basic plans to achieve them at the national level, Al-Mustaqbal University College had launched an initiative to implement a series of lectures aims to host international experts to develop the

necessary strategies to implement projects that contribute achieving the requirements of sustainable development. On his part Assist. Prof. Dr. Hasan Shakir Majdi, Dean of Al-Mustaqbal University College indicated that: "The faculty seeks to be part of the World of Sustainability that aspires to achieve economic growth and addresses a series of social needs.

This effort crystallized and became an urge when the faculty started to join the global classifications related to sustainable development and the pursuit of advanced ranks in it." On Tuesday, 10 November 2020, the college contributed to hosting Dr. Thalita S. Dalbelo from the University of Campinas in Brazil via Zoom Meetings platform to deliver the lecture entitled: ‘How to Produce a Sustainability Master Plan?’The lecture included setting plans to address climate change and environmental protection, in addition to plans to achieve human development goals such as education, health and social protection.

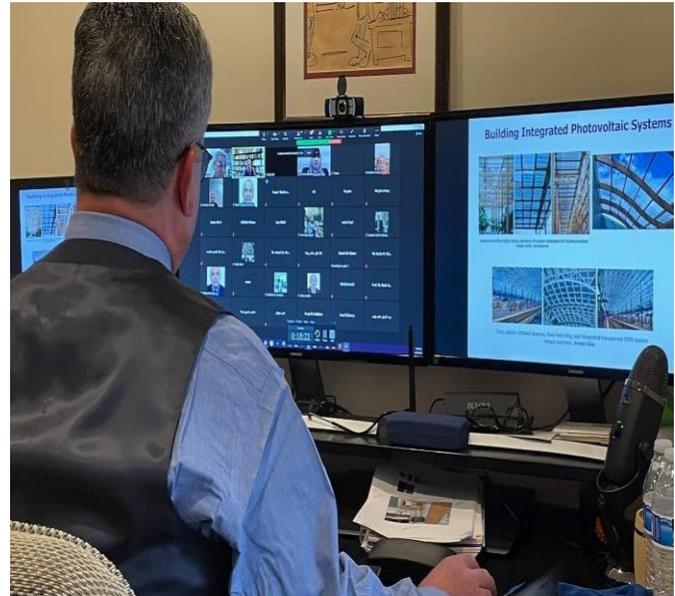

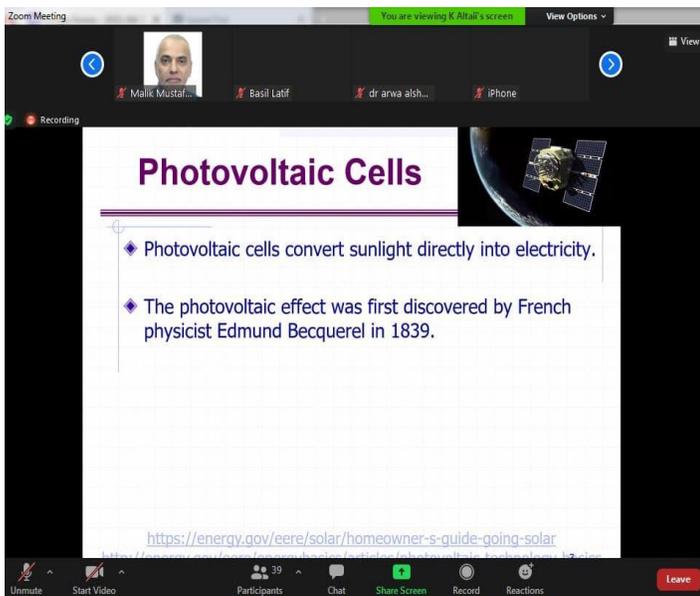

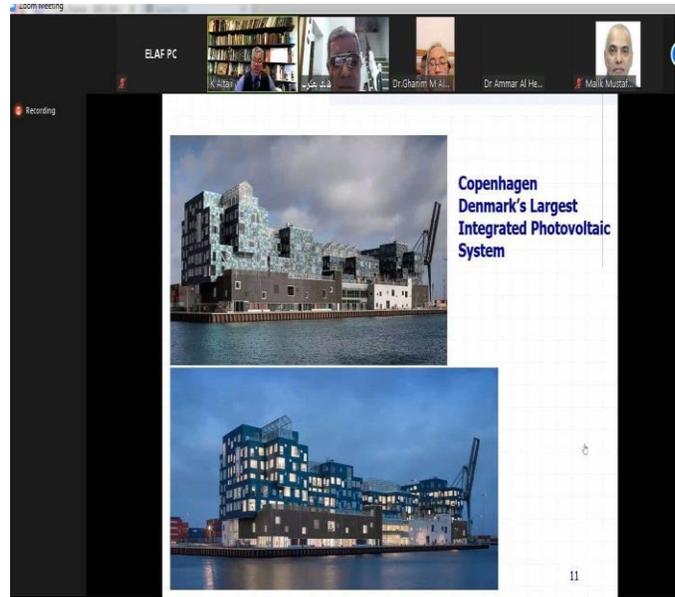

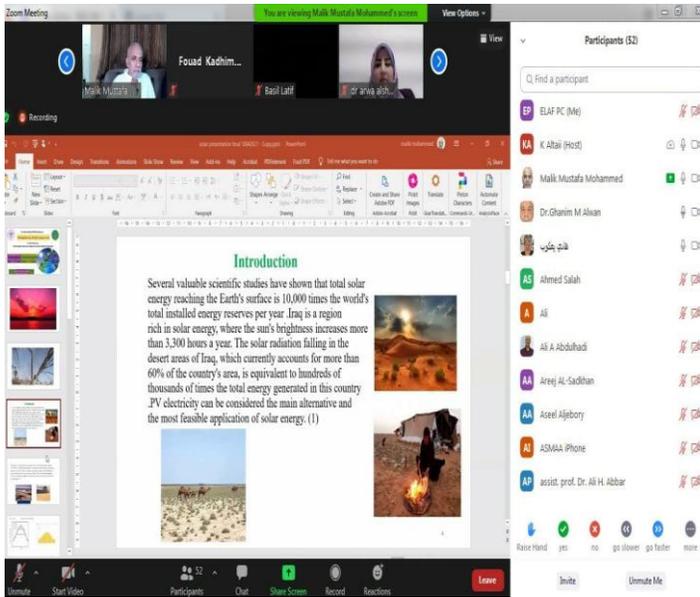

Dr. Hamza Mohammed Ridha Al-Khafaji, Head of Research and Studies Unit of Al-Mustaqbal University College explained that: "The lecture’s attendance varied from 7 countries and from several Iraqi universities, including professors and those who are interested in sustainable development, the lecture centered on distinguished discussions. Also the efforts are continuing to invite other international experts in the same field during the next month." The Dean of the College had praised the distinguished efforts of the Research and Studies Unit and the Information Technology Unit for commended the high-level work coordination to provide such featured international lectures.

## **2.9. A workshop about Importance of Solar Energy**

In Cooperation with James Madison University (USA), Al-Mustaqbal University College organizes a workshop on the importance of Solar Energy In accordance with the vision of Al-Mustaqbal University College, which mainly focuses on the achievement of the SDGs of the UNDP, as well as its constant endeavor to set well-designed plans for accomplishing these goals properly, a virtual workshop on “The Importance of Solar Energy” was held on 10th of April 2021, with the participation of Dr. Karim Altaii representing James Madison University in the USA, and Assist Prof. Dr. Malik Mustafa Muhammad, Head of the Dept. of Chemical Engineering & Petroleum Industries at Al-Mustaqbal University College. This workshop is just an example and a step, among many others, towards creating the solid ground for genuine relationships with international universities. Commenting on this initiative, Professor Dr. Hassan Shakir Majdi, Dean of the MUC, said, “Our university college always seeks to become part of the world of sustainability, in which a new image of economic growth is being created, and meanwhile addressing a series of societal needs, climate changes and protection of environment.

It is remarkable to note that the workshop was attended by more than 50 participants from different countries, and the two lecturing professors exchanged their wide knowledge about the importance of solar energy in Iraq, creating meanwhile plausible environment for useful and highly effective discussions. In his rich and impressive lecture, Professor Altaii said in an admitting and honest tone, “ Yes, we may not need solar energy in Harrisonburg, but Iraq is a different story as it suffers from a shortage in electricity, and at the same time it could be considered as a rich market for solar energy”. He closed his speech by saying, “We hope that we have planted a seed for participants to think about how they could improve their lives”. From his side, Assistant Professor Dr. Malik Mustafa Muhammad reviewed in his introduction on solar energy the possibility of investing it as a promising alternative with which dramatic changes could occur in the field of energy in Iraq.

This workshop indeed constitutes a valued addition to the constant efforts made by everybody in college including the academics to raise awareness. Such activities of exchanging knowledge and experiences could be a source of aspiration to participants. Moreover, they shall bring more opportunities for the growth of universities through the processes of exploring and implementing new technologies that could improve and reinforce quality of life, in a planet that is more sustainable for all.

## 2.10. A workshop about Sports at the Service of Sustainable Development

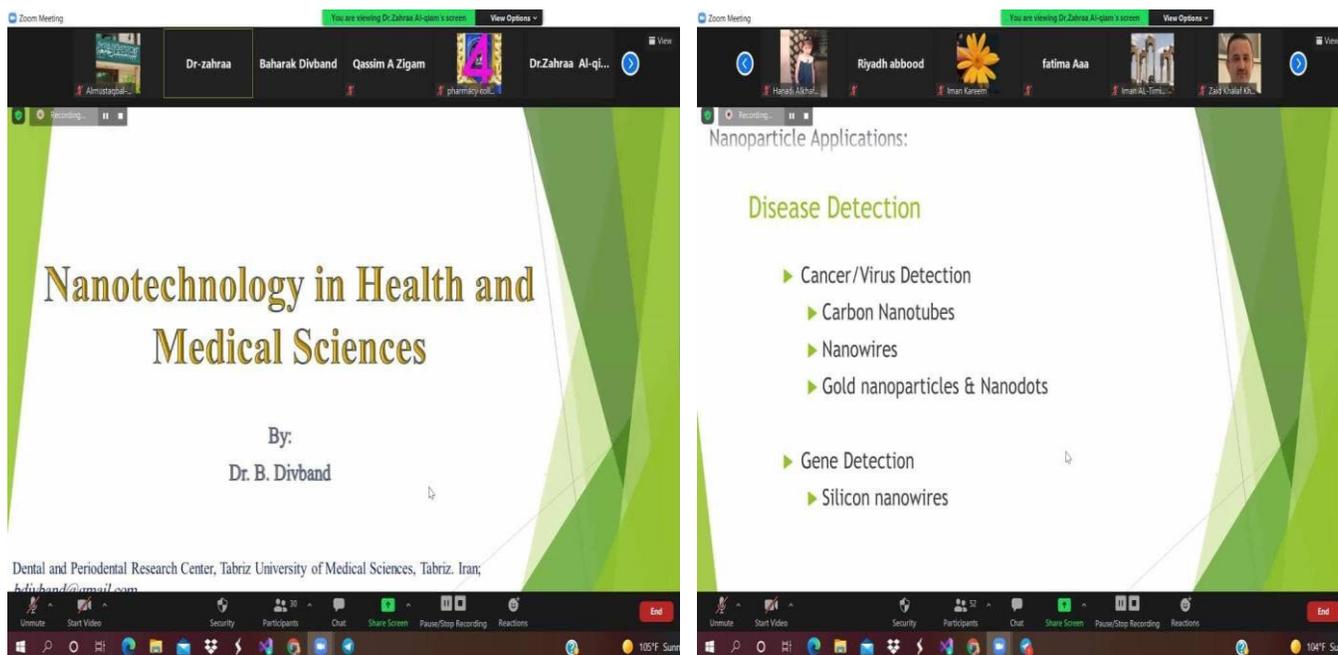

The International Center for Media and Sustainable Development, and in cooperation with the International Friendship Organization and Al-Mustaqbal University College has organized a workshop under the title “Sports at the Service of Sustainable Development” Several lecturers coming from different countries have participated in the workshop, starting with Dr. Iman Talhi from Algeria who has clarified that Sustainable Development meets the needs of the present without leaving any negative effect on future requirements of the new generations.

On the contrary, sustainable development shall assist in placing future plans for these generations. Moreover, she has given details about the developmental plan of the 2030 agenda, which includes achievement of the 17 SDGs, clarifying that the main objective of these goals is not to leave anybody behind. She has also pointed out the indicators of these SDGs, referring meanwhile to the Arab countries that came on top of the 2019 ranking, and they are Algeria, United Arab Emirates, Morocco, Tunisia, and Jordan.

The image consists of three screenshots from a Zoom meeting. The top-left screenshot shows a presentation slide with a colorful SDG wheel and text in Arabic: "SPORTS, A UNIVERSALLY ACCEPTABLE PLATFORM WITH A STRONG CONVENING ON SUSTAINABLE DEVELOPMENT" and "الرياضة منصة عالمية ذو تأثير قوي على التنمية المستدامة". The top-right screenshot shows a world map titled "Response rate per country" with a legend for response rates. The bottom screenshot shows a research paper titled "Sustainable Development Goals, Sports and Physical Activity: The Localization of Health-Related Sustainable Development Goals Through Sports in China: A Narrative Review" by Jianhui Dai and Rashid Menhas.

## 2.11. A workshop about Applications of Nano-Technology in Health & Medical Sciences

An International Medical Workshop in Cooperation with the University of Tabriz for Medical Sciences Under the guardianship of Prof. Dr. Hasan Shakir Majdi, Dean of Al-Mustaqbal University College, an international medical workshop has been organized in cooperation with the University of Tabriz for Medical Sciences. The title of the workshop is “Applications of Nano-Technology in Health & Medical Sciences” The lecturer has been Dr. Baharak Divband, a specialist in Nano & Micro Materials Synthesis, Dental and Periodontal Research Center. The lecturer has investigated the great importance of Nano-Technology Science and its applications in health and medicine, as it is used in drug delivery as well as in the diagnosis and treatment of the different types of cancer, etc. Moreover, there is a possibility to utilize Nano-Materials in vaccinations, and they are newly discovered methods. They have also been used in diagnosing diseases, specifically with Corona Virus. Dr. Baharak has indicated that Nano-Materials could be utilized in gene therapy through the processes of detecting genes and genetic mutations that cause diseases. Besides, Nano-technology has become quite essential in the field of dentistry and its various applications. Some of these applications have been introduced such as the use of gold and silver nan-particles as antibiotics to dispose of microscopic germs and viruses. In the end, Assist. Prof. Dr. Zahra Halim Al-Qayyim has declared that organizing such workshops aim to exchange experiences in the field of Nano-Technology between researchers and academics, providing meanwhile networking opportunities for those researchers and academics to work as teams in the various fields of scientific research.

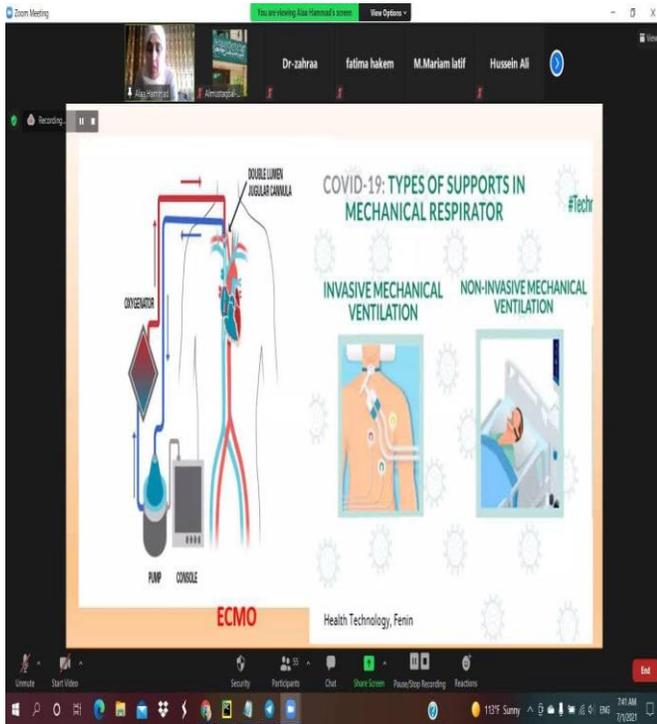

## 2.12.A workshop about Pharmacotherapeutic Agents for the Management of COVID19

Al-Mustaqbal University College Organizes an International Medical Workshop in Cooperation with Al-Zaytoonah University, Jordan Under the guardianship of Prof. Dr. Hasan Shakir Majdi, Dean of Al-Mustaqbal University College, with the supervision of Dr. Zahra Haleem Al-Qaim, an International Medical Workshop has been organized in cooperation with Al-Zaytoonah University, Jordan, entitled “Pharmacotherapeutic Agents for the Management of COVID19” Dr. Alaa Mahmoud Ahmed Hammad, Dept. of Pharmacy, with a Ph.D. in “Experimental Therapeutics”, University of Toledo, Toledo, Ohio, USA, has been selected to give the lecture. In her lecture, Dr. Alaa has dealt with several issues including 1) Composition of Corona Virus 2) The Biological Structure of the Virus 3) Medicines & Treatment Protocols Used 4) Types of Vaccines Recently Introduced 5) Mechanism of Vaccines Processes. The most appropriate methods of prevention of the pandemic has also been raised in the workshop and how to successfully limit its spread, focusing mainly on the use of sterilizers, detergents and disinfectants that are highly effective against the epidemic Corona Virus. At the end of the workshop, Dr. Zahra Haleem Al-Qaim has clarified that the main objective that lies behind organizing such workshops is to exchange experiences between researchers and academics all together with providing opportunities for electronic contacts between the researchers of different specializations as a vital step towards constituting research teams working on health problems in the fields of disease treatment, drug discovery, etc. It is considerable to note that a number of participants of different scientific specializations have had an active role in the workshop

The image shows a Zoom meeting interface. The main window displays a presentation slide titled "Clinical Presentation of Covid-19". The slide is divided into five horizontal sections, each with a colored arrow pointing right, containing text about different stages of infection:

- Asymptomatic Infection** (Blue arrow): Absence of clinical signs and symptoms of the disease and normal chest X-ray or CT scan associated with a positive test for SARS-CoV-2
- Mild Infection** (Teal arrow): Upper airway symptoms such as fever, fatigue, myalgia, cough, sore throat, runny nose and sneezing. Pulmonary clinical exam is normal. Some cases may not have fever and others may experience gastrointestinal symptoms such as nausea, vomiting, abdominal pain, and diarrhea.
- Moderate Infection** (Green arrow): Clinical signs of pneumonia. Persistent fever, initially dry cough, which becomes productive, may have wheezing or crackles on pulmonary auscultation but shows no respiratory distress. Some individuals may not have symptoms or clinical signs, but chest CT scan reveals typical pulmonary lesions.
- Severe Infection** (Yellow arrow): Initial respiratory symptoms may be associated with gastrointestinal symptoms such as diarrhea. The clinical deterioration usually occurs in a week with the development of dyspnea and hypoxemia (blood oxygen saturation  $[SaO_2] < 94%$ )
- Critical Infection** (Red arrow): Patients can quickly deteriorate to acute respiratory distress syndrome or respiratory failure and may present shock, encephalopathy, myocardial injury or heart failure, coagulopathy, acute kidney injury, and multiple organ dysfunction.

On the left side of the Zoom window, there is a chat window with Arabic text. The text includes questions and answers about COVID-19 vaccines, such as "ما بعد كم يوم من ظهور الأعراض يكون انتقال العدوى من الشخص المصاب إلى السليم؟" (How many days after the appearance of symptoms does the infection spread from the infected person to the healthy person?).

## 2.13. Thanks and Appreciation from the International Center for Media and Sustainable Development

Prof. Dr. Mazin Hadi Kazar Al-Taie, Head of the Department of Physical Education and Sports Sciences, received a letter of thanks and appreciation from the International Center for Media and Sustainable Development and the International Friendship Association in Sweden for the efforts made in chairing the Sports Committee of the International Center for Media and Sustainable Development and for organizing the International Workshop on Sports in the Service of Sustainable Development on Friday, corresponding 10/8/2021 ,With international participation in the workshop, in which the reality of sport in the service of sustainable development was discussed.

## 2.14. Participating in a Training Course on the Technologies of Wind Energy

Part of the constant initiatives of Al-Mustaqbal University College to train students on Sustainable Energy Industry, fourth year students of Air Conditioning & Refrigeration Engineering Department participated in an interactive training course via internet about the technologies of wind energy in Egypt, which was organized by the British University in Egypt within the R Industry Project. The Training course lasted for 5 days during the period between 23rd & 27th of May 2021, and it has dealt with several topics, such as 1) An Introduction to Wind Energy, 2) Concepts of Wind Energy, 3) Aerodynamics of Wind Turbine Blades, 4) Wind Turbine Micro-Siting, 5) International Standards for Wind Turbines, 6) Use of Techno-Economic Software for Wind Energy Projects. It is considerable to note that 100 participants from different Arab countries joined this course, and at the end each student was awarded a "Participation & Pass

Certificate” .Our best regards to the participants, wishing them everlasting success in their scientific and practical career.

## 2.15. The Academic Ms. Zahra Al-Khafaji Participates in a Workshop on Designing Lab Devices

According to the instructions given by Assist Prof. Dr. Azher M. Abed, Head of Air Conditioning & Refrigeration Engineering Department, with the ardency of academics to attend workshops and seminars despite the critical circumstances caused by COVID19, the academic Ms. Zahra Al-Khafaji of the Air-Conditioning & Refrigeration Dept. has participated in the virtual workshop related to designing and manufacturing lab equipment, which operates with SCADA System. A detailed explanation of the lab devices, how they work, along with their features and benefits have been provided through the workshop.

Members of the Spanish Edibon Company, specialized in educational equipment have participated in the workshop as well. Besides, the staff of the Energy Science Company of the Ministry of Higher Education has also attended the workshop.
