# Muscles of the Human Eye

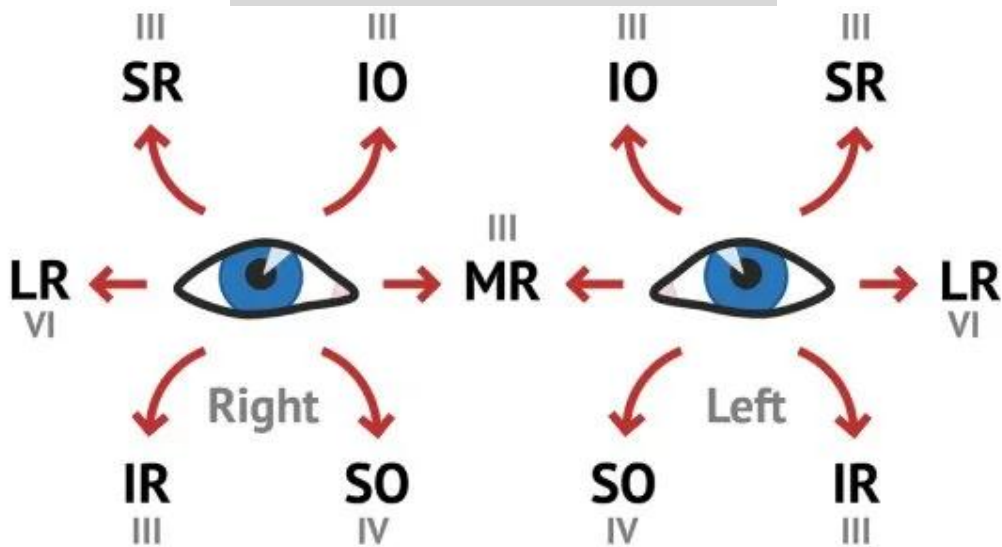

VectorStock®

VectorStock.com/27346493

## *Eye muscle movement*

- 1-The lateral rectus muscle** turns the eye outward.
- 2-The medial rectus muscle** turns the eye inward to look toward the nose.
- 3-The superior rectus muscle** turns the eye to look upward and inward.
- 4-The inferior rectus muscle** turns the eye to look down and inward.
- 5-The superior oblique muscle** turns the eye to look down and out.
- 6-The inferior oblique muscle** turns the eye to look up and out.

**Eye muscle movement**(*For viewing only*)
