

## The first semester

### Introduction

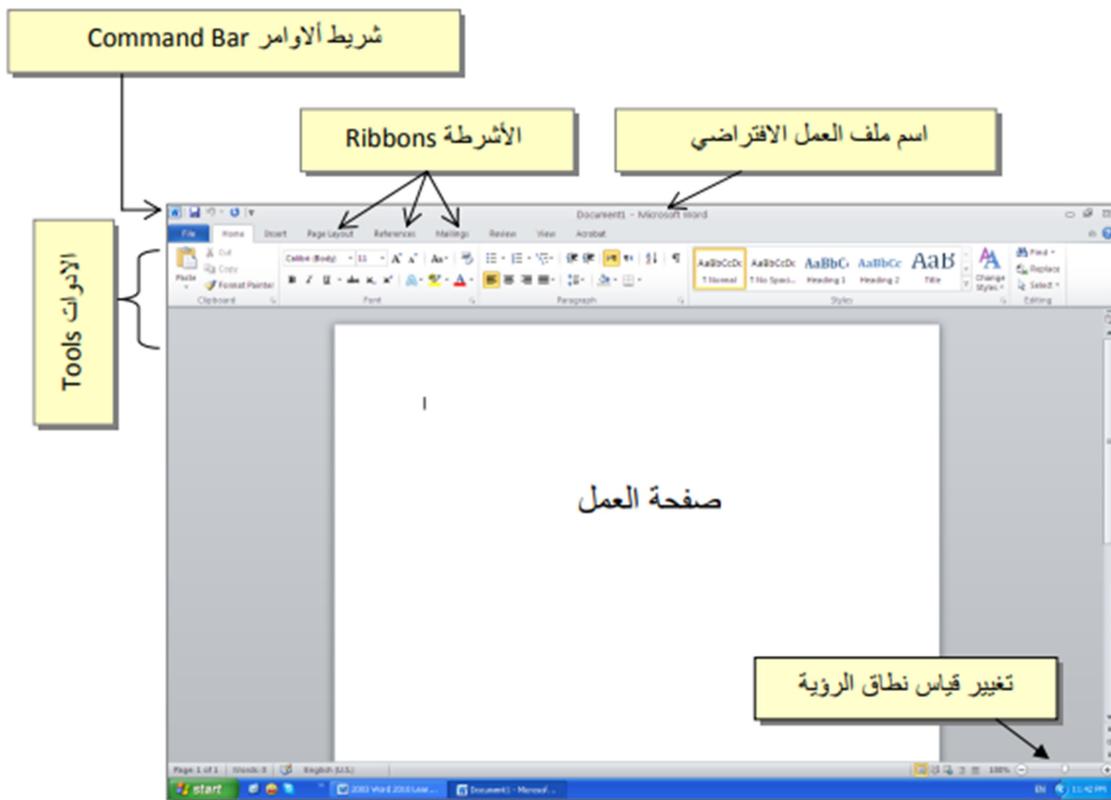

Microsoft Word 2010 is one of the programs of the Office 2010 package and is dedicated to word processing, as it allows entering words electronically on virtual pages within a file under the name "Document" with the ability to include tables, images and statistical charts. These pages are printable, typeset, and updateable, with the possibility of keeping the original file. Without affecting, the program provides the ability to arrange data Sorting / Find / Create hyperlinks within a single document or effectively link text to an external file of another type.

### The main interface The main interface

To run Microsoft Word 2010,

click Start -> All Programs -> Microsoft Office -> Microsoft Word 2010

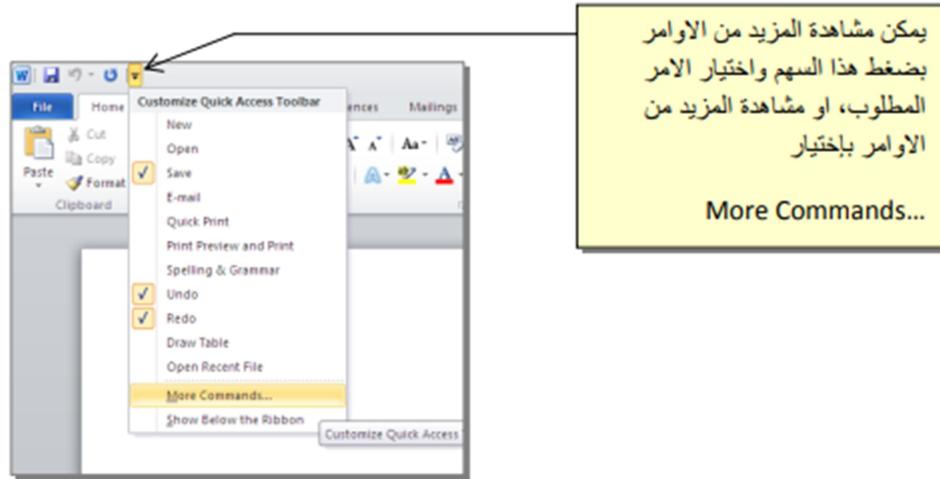

The following window will appear:

\* Ribbons = menu bar

The main interface elements are:

- Bar Command : شريط الاوامر : It is a set of icons to carry out the main tasks (Like saving, going back a step back) , More commands can be seen by clicking on the small black arrow to the left of the icons. You can add more commands by pressing the black arrow to the left of the icons and selecting More commands :

- Ribbons : They are pages classified according to the functionality of the tools they contain. You can move between bars by clicking on the name of the bar.
- Tools : Each tape contains a set of tools that perform the functions classified according to the name of the tape.
- If we want to change the file name: click on the bar (File -> save as ) The following window will appear:

And now the changes can be stored each time under the same name

by pressing a bar (file -> save ) or click on the icon in the command bar.

## النص الرئيسي Word art

The main text is used to create text with special effects such as ( glow , shadow , وهج ظل , gradient تدرج لوني , reflection انعكاس est..)

To insert a main text: click insert -> click icon -> Choose one of the desired shape from the list , Note that the shape can be modified after that > a text box will appear for you to write the desired text inside:

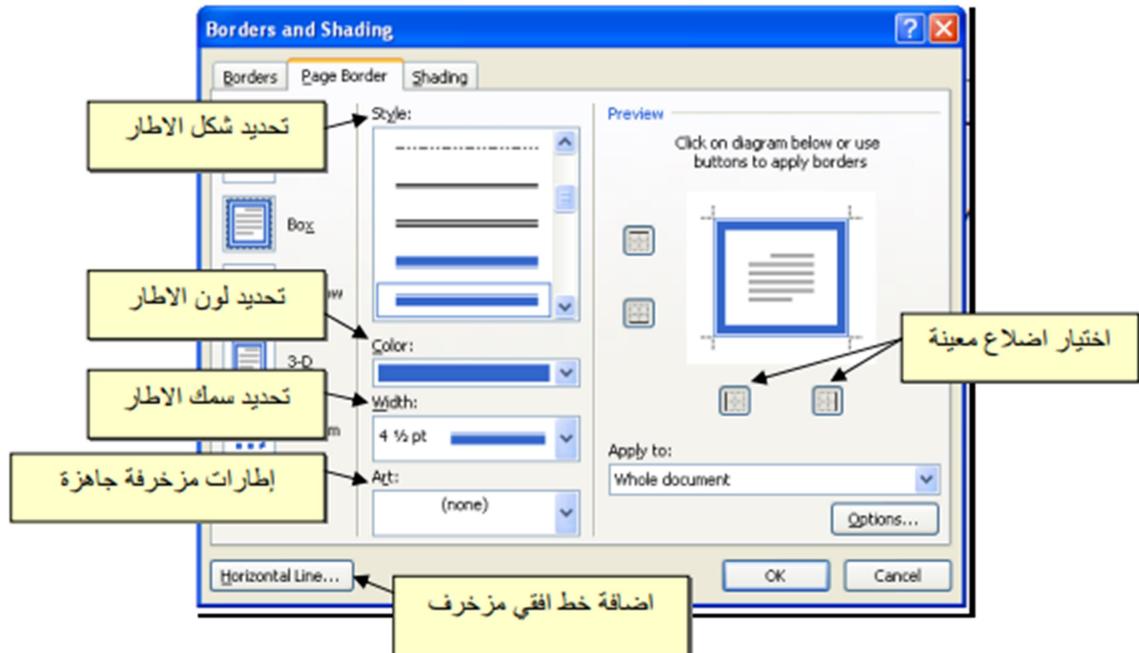

- To change the font size: click home -> click Zoom in and Zoom out.

- : To change the color of the text.
- : To change the fill color of the text box.

## General Settings

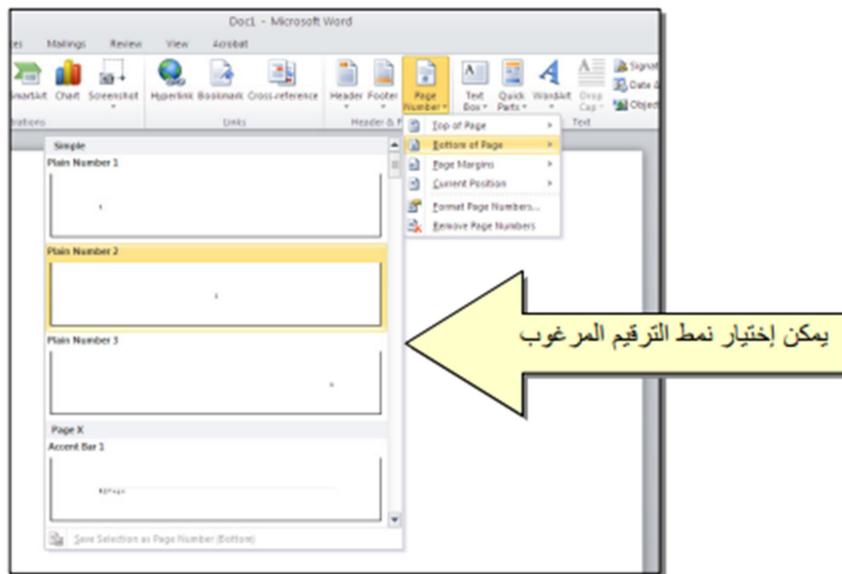

- To make a page frame: click page layout -> page boarders -> The following window will appear:

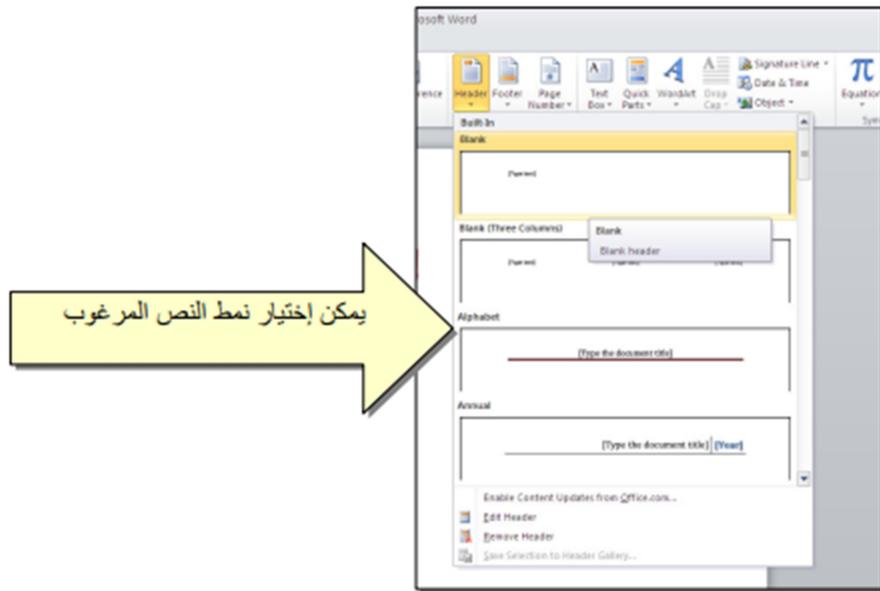

- to show the ruler (rule): click view -> put a mark √ inside a box ruler .
- To add page numbers: click insert -> page number -> click top of page to print the Page numbers at the top of the page or click

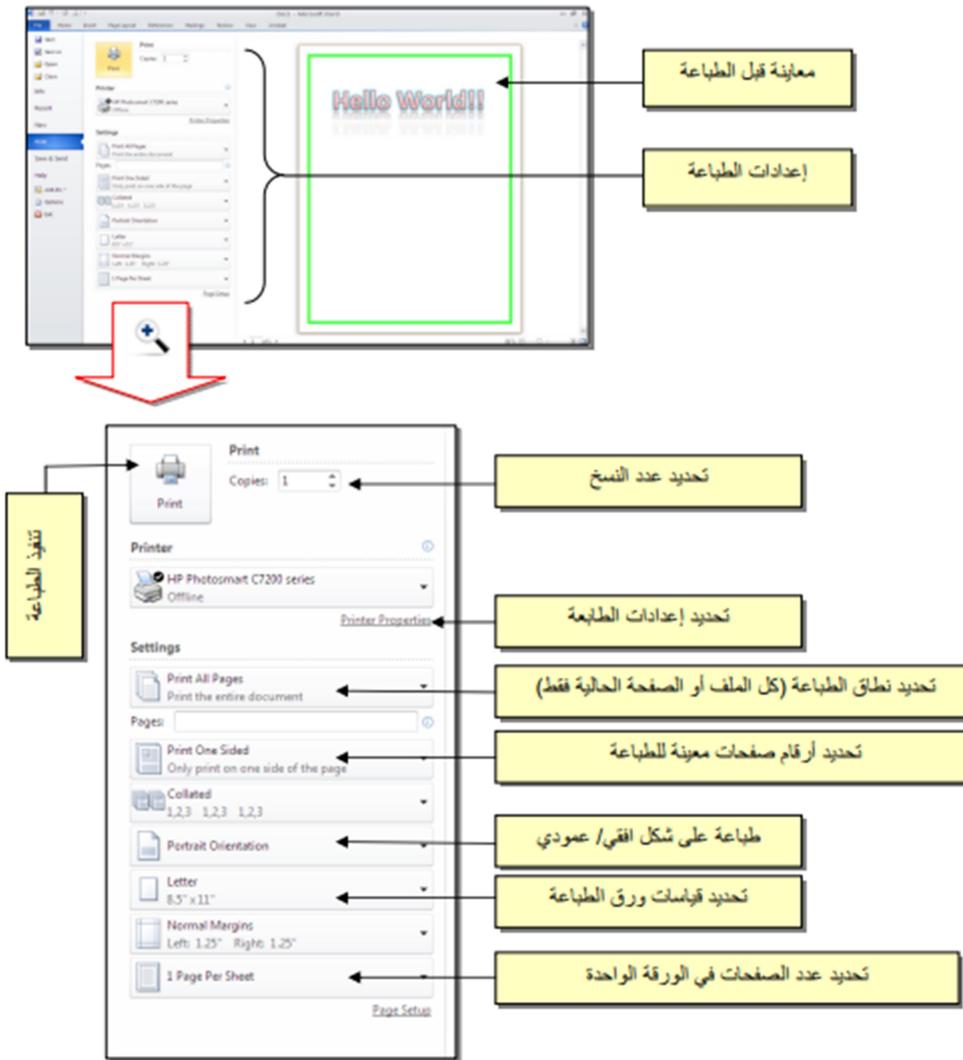

bottom of page to print the Page numbers at the bottom of the page.

- To add text at the top and bottom of all pages (eg book name, chapter title): click insert -> click header To add text at the top of pages or click footer To add text at the bottom of pages. Texts will appear on all pages automatically.

- for printing: click file -> click print -> Select Settings in the window below -> Click the Print button print:

## النصوص :

## مختصرات مُختصرات لوحة المفاتيح الأساسية Keyboard Shortcut

المفاتيح	الفعالية
$\downarrow \rightarrow \uparrow \leftarrow$	تحريك المؤشر في المستند.
Home	نقل المؤشر الى بداية السطر.
End	نقل المؤشر الى نهاية السطر.
Insert	عند تفعيل هذا المفتاح، يمكن الكتابة بين الحروف مع دفع الحروف المتبقية، وعند عدم تفعيله يتم الكتابة فوق الحروف.
Shift + ( $\downarrow \rightarrow \uparrow \leftarrow$ )	تظليل النص من موقع المؤشر باتجاه السهم.
Shift + Home	تظليل النص من موقع المؤشر الى بداية السطر.
Shift + End	تظليل النص من موقع المؤشر الى نهاية السطر.
Ctrl + A	تظليل كل المستند.
caps lock	عند تفعيل هذا الزر، يتم الطباعة بحروف انكليزية كبيرة.
Shift + أي حرف انكليزي بالشكل الكبير.	طباعة الحرف الانكليزي بالشكل الكبير.
Delete	مسح حرف من أمام المؤشر.
backspace	مسح حرف من وراء المؤشر.
Ctrl + C	نسخ النص المظلل.
Ctrl + X	قص النص المظلل.
Ctrl + V	لصق النص المنسوخ أو المقطوع .Paste
Ctrl + B	تحويل النص المظلل الى نص سميك Bold.
Ctrl + I	تحويل النص المظلل الى نص مائل Italic.
Ctrl + U	رسم خط تحت النص المظلل.
Ctrl + Z	الرجوع بالعمل خطوة الى الوراء Undo.
Ctrl + Y	الغاء الرجوع الاخير، عكس عمل (Ctrl + Z).
Ctrl + S	خزن Save.
Ctrl + P	طباعة (بالطابعة) Print.
Ctrl + ]	تكبير حجم الخط درجة واحدة.
Ctrl + [	تصغير حجم الخط درجة واحدة.
Ctrl + F	بحث عن كلمة معينة Find.
Ctrl + N	فتح مستند جديد New.
Ctrl + O	فتح نافذة المستعرض Windows Explorer لفتح ملف موجود Open.
Ctrl + W	غلق المستند Close.

## الجدوال

The Word program provides the ability to create a table in an easy way, and you can control the type of frame, colors, fonts, and the ability to arrange the content alphabetically. There are several ways to draw a table, the most efficient are:

Click insert ->click icon -> click insert Table -> The following window will appear:

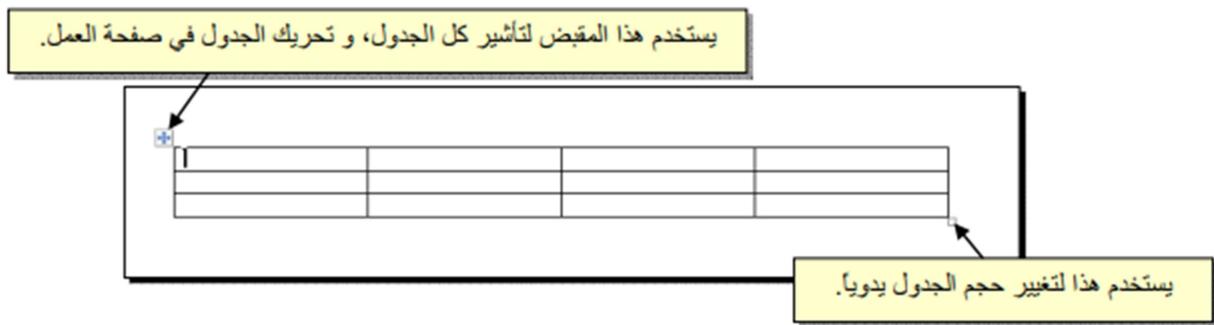

The desired table will be drawn on the width of the page. For example, when choosing a table consisting of four columns and three lines:

To select all table cells: place the cursor over the table -> the figure appears In the upper left corner of the table, click on it to select all the table cells. The same handle is used to move the table on the work page.

Specify the number of columns Specify the number of lines.

To change table measurements manually: Place the cursor over the table -> click on the shape that It will appear in the lower right corner -> drag the table to the desired size:

- When the table is enlarged, the writing will be stacked in the corners of the cells, to center the typing in the cells: highlight the table -> right click -> Cell Alignment -> Choose the desired shape:

	Arabic	English	Physical
All	65	88	70
Deema	79	71	80
Sarah	75	80	82

- To change the color of the table frame, or change the frame style:  
Table shade-> Click the Design bar ->Select the appropriate settings:

أولاً: حدد نوع خط الإطار ، سماكة الإطار ،  
ولون الإطار من هذا القسم

ثانياً: حدد منطقة تطبيق هذه الاعدادات من هذه  
القائمة (كل الجدول، الإطار فقط، .....)

Draw Borders

### Note:

When the table is inserted, a list appear menu bar -> table tools (design , layout).
