22. Format a Table

AutoFormat has numerous table formats that may be applied to your table. These different **Table Styles** may affect the style of the lines or borders in the table, the justification of text and font formats. If your Word document contains more than one table, each table may have its own format. Try to make all editing changes to the table before using AutoFormat.

A. AutoFormat

1. Apply **AutoFormat** to your Table that was created.

2. Select your Table.

3. On the **Table Tools** ribbon, click on the **Design** tab located in the **Table Styles** group, and then click on the drop-down arrow to view multiple formats to select from.

4. Click on a **Table Style** of your choice.

Note: Shading and Borders can also be applied to one or more cells. The Shading and Border buttons are located in the **Table Styles** group as well.

B. Text Format and Alignment

Text within a table can be formatted the same way you format text in other areas of the document. Use the command buttons found on the **Home** ribbon.
