

	<b>SUBJECT:</b> Principles of Cyber Security		<b>CODE:</b> CYSP115		<b>MARK:</b>  <span style="font-size: 2em;">/5</span>
	<b>TOPIC:</b> Lecture 01 - 04				
	<b>ASSESSMENT:</b> Assignment		<b>NO:</b> 1	<b>TIME:</b> 3 Days	

**NAME:** \_\_\_\_\_

**ID NO.:** \_\_\_\_\_

**Instruction:**

- This assignment carries out 5% from your assessment mark.
- This assessment is a group assignment of **FIVE (5)** members not more than.

**Case study**

One of the ways to help remember technical information is to relate where and how a technology is implemented. If possible, ask an IT professional at your university or your place of work which of the authentication technologies are being used in the university or workplace's network. Ask the person **why that particular technology** was chosen and relate the information you learned back to the contents of this module.

**Good Luck**
